

Call for application for the recruitment of one Master's student

As part of a project entitled: **Strengthening local capacity for malaria surveillance and elimination in Africa** funded by the Bill and Melinda Foundation, the Centre for Research in Infectious Diseases (CRID), is launching a call for application addressed to young students residing in Cameroon for Master 2 project.

This project will run for 1 year and focus on the contribution of secondary vectors on malaria transmission in context of intensive use of vector control strategies in savannah and forest areas in Cameroon.

REQUIREMENTS

The applicant must be registered in Master 2 (or have completed his Master in the 3 past years) in Biochemistry, Microbiology, Biology or any other biomedical field.

He/she must demonstrate competences in either molecular biology, biochemistry, entomology, epidemiology and statistics with an appreciable level in oral and written English.

The candidate will be fully involved in study design, field expedition, laboratory work and any other task associated to the project.

He/she must be able to critically analyze his project, integrate, collaborate and interact with a multi-disciplinary research team.

The application must be addressed and sent to crid@crid-cam.net and should include (unique PDF file):

- **Updated detailed curriculum vitae;**
- **A letter of motivation;**
- **Academic transcripts;**
- **A support letter from previous supervisor.**

Application deadline: June 30th, 2021. Shortlisted candidates will be called for an interview on the 11th July 2021

For more information contact **Dr Emmanuel Elanga-Ndille** (emmanuel.elanga@crid-cam.net)
